Dear Dr. Raja,
Good morning !

Thank you for prescribing iron supplements based on my wife Ramya's reports. She has started taking these supplements. However, she is still feeling very tired and feels completely de-energised most of the time. She gets fresh in short spurts during which time she is able to perform some chores otherwise she feels very drained of energy.

With a small kid at home we would like her to become her usual energetic self.

May we request you to suggest what our immediate course of action should be to reverse the situation? Note that it has been like this for the last 6 weeks or so.

Thanks in advance.

Lovingly,
Balasubramaniam.
