Dear Doctors,

My kid Aniketh Emani has been having ear problems for 3 weeks. We consulted an ENT doctor at Rainbow Hospital and he gave us some medicines and suggested removal of adenoids and tonsils. In the last two days, there has been swelling below the ear and side of the neck. The anti-biotics seem to have a limited effect on the ear infection.

We would like to seek a second opinion at KIMS Kondapur and consider the next course of treatment.

Can you provide a referral?

Regards,
Naresh
