Dear Prof Chandra

I was in discussion with the Gas Authority of India Ltd (GAIL) for the past several months for a collaborative project related to the development and characterization of H₂-CNG blended IC Engine combustion. As part of this discussion, GAIL wanted an OEM to also participate. After contacting few engine OEMs, Ashok Leyland responded and showed interested in this collaborative work. They invited me and Dr Pankaj Kolhe to visit their Engine R&D facility at Hosur, TN on 31st March.

I was wondering if I can claim the travel expense of this trip from the Rs 50,000 that the Director assigned in the last financial year to each faculty for establishing collaboration with industry or R&D labs. I understand this trip was taken on the last day of the financial year and should have been claimed before the end of the FY, but it took several online meetings and telephonic discussions to come to this point. The confirmation of this meeting came just a few days before the actual trip. I am attaching the invitation from GAIL for the first online meeting in Aug, 2022 and finally the invitation from Ashok Leyland to visit their facility on 31st March as reference. I would appreciate if you can approve the expense of this trip through that scheme, if possible.

With Regards
